

TIME TO THINK ABOUT SNOW RETENTION

ACTUAL PHOTO OF CRUSHED FRAME DUE TO FALLING ICE AND SNOW FROM A BUILDING - GLOBAL NEWS MONCTON. NB.

IS SNOW REALLY THAT HEAVY ?

WET COMPACTED SNOW CAN WEIGH
UP TO OR MORE THAN 20LBS PER
CUBIC FOOT !

SO WHAT DOES THAT MEAN?

IT MEANS THAT WHEN THE SNOW
SLIDES OFF THE ROOF IT CAN
SERIOUSLY HARM PEOPLE OR THINGS !

CAN I STOP IT FROM FALLING ?

YOU CAN DEFINITELY HELP THE
SITUATION BY INSTALLING A SNOW
RETENTION SYSTEM ON YOUR ROOF.

WHAT IS A SNOW RETENTION SYSTEM ANYWAY

A SNOW RETENTION SYSTEM IS A DEVICE OR SYSTEM THAT
RETAINS SNOW PACK ON A ROOF. THE IDEA IS TO EVACUATE THE
SNOW IN A PREDICTABLE AND CONTROLLED FASHION. IN OTHER
WORDS-- EVAPORATION AND THAW RATHER THAN BY A
SUDDEN AND DANGEROUS ROOFTOP AVALANCHE.

GREAT! WHO DO I CONTACT TO GET MY SYSTEM
